MTN MoMo Payment Gateway

This project provides a PHP-based integration with the MTN Mobile Money (MoMo) API. It facilitates seamless payment processing, enabling users to make transactions using MTN MoMo.

Requirements

- PHP 7.2 or higher
- Composer
- CURL
- OpenSSL
- Momo API account

Features

- **Simple API Integration**: Easily integrate MTN MoMo payment functionalities into your application.
- **Secure Transactions**: Built-in security measures to ensure safe payment processing.
- **UUID Generation**: Generate unique identifiers for transactions.
- **Logging**: Monitor API requests and responses for better debugging and tracking.
- **Environment Management**: Securely manage sensitive information like API keys and secrets.
